Myers-Holum appoints *SWOOD* as a reseller of ChartGen 2000

SWOOD and Myers-Holum are pleased to announce that ChartGen 2000 has been added to the suite of products that *SWOOD* distributes to Masterpiece/Net clients.

ChartGen is a software tool developed by MHI to assist with Chart of Accounts (COA) design, development and maintenance for Masterpiece GL Systems. It is fully Masterpiece/Net compatible, and allows the user to model General Ledger accounts and relationships and greatly simplify the process of building and maintaining a COA. The general release of ChartGen 2000 is now available, offering speedy 32-bit technology, the latest user interface enhancements, and full Windows 2000 compatibility.

Stephen Wood says:

"First released in the 1990's, ChartGen has matured into a true value added product for Masterpiece/Net. With the introduction of this latest version - ChartGen 2000 - it provides an easy to use chart of accounts design and maintenance toolkit for Masterpiece/Net. ChartGen 2000 is a complete end-to-end solution for getting your chart of accounts into Masterpiece/Net.

SWOOD is committed to distributing and supporting ChartGen 2000 for new and existing clients in the Asia/Pacific region."

Knute Holum says:

"Myers-Holum is pleased to add SWOOD as the Asia/Pacific distributor for our chart of accounts modelling product ChartGen 2000.

After the success of ChartGen 2000 in the Australian market we are keen to ensure that clients receive continued support within the Asia/Pacific region."

Corporate Backgrounders :

SWOOD **financial solutions** is a fully Australian owned and operated software consulting organisation dedicated to supporting financial systems and providing business solutions. Since 1996 *SWOOD* has supported the Masterpiece/Net suite of financials. *SWOOD* has developed *e-crow*® for reconciling corporate credit cards and distributes the idu-Software suite of products and PlanetPress for all of your electronic forms needs.

Visit the *SWOOD* website at http://www.swood.com.au/

Since the late 1980's, **Myers-Holum** has been, by far, the dominant CA Masterpiece consulting firm, accumulating over ½ million hours of CA Masterpiece experience.

Moreover, we have taken a leadership role in implementing complementary products that dramatically enhance the utility of Masterpiece. These complementary products not only include third-party offerings, such as BroadVision, Informatica, and Seagate Software products, but also our own proprietary software, such as Chartgen, Visual Budgets, and Visual Journals.
